(Genomen op 9/05/2007 op de leeftijd van 1 Jaar en 10 Maanden)

Wolanalyse-organisatie: Natural Fibre Centre

Omschrijving:

Here you get both Ivano and Alpamayo lineage with this nice male with fine fibre. He is ready to begin his breeding career. He has great confirmation and is very calm. He is one of two males we have from Tyvano, a son of Ivano. Perhaps he will follow his father in giving female crias. We used him last year with a few females that are not related to him.

Latte May 2008
