(Genomen op 3/06/2008 op de leeftijd van 1 Jaar en 9 Maanden )

**Wolanalyse-organisatie:** Yocom-McColl Testing Laboratories

### Omschrijving:

This little sweetheart has her mom's lovely face and the fine fibre and long staple length of both her parents. BeeBee's fibre stats reflect her excellent breeding. As of June 3, 2008 her AFD was 22.5 with a SD of 5.4 and a CV of 24.2. Her fibres greater than 30 microns were 7.7% with her medullated fibres being 10.1% and her mean curve of 40.9. BeeBee's sire, dark fawn full Bolivian Major-B, boasts a fine fleece with extreme coverage while her mom had a 15.7 AFD at 2 years of age when she was imported into Canada.

She is be bred to our multi-ribbon winner, light fawn Peruvian Guillermo son, Almanzo, for her first cria June 10th, 2009. Susan Tellez spoke of his fleece - "extreme density and extreme expression of crimp, very uniform throughout." In 2002 at 3 years of age, Almanzo's fibre stats were AFD 25.6 SD 3.8 CV 15.0%. He is a big boy with fabulous presence

**Naam van de dekhengst:** Almanzo (Lichtbeige)
