**Registriert mit:** CLAA # 37572

ARI # 31366670

**Blutlinie:** Peruvian / Chilean

**Geburtsdatum:** 27/07/2008

### Beschreibung:

Firefly is an adorable female with unique colouring and a very regal look about her. As a cria she had energy to burn and flitted around the pasture, hence her name! Firefly is true black throughout her blanket, with white feet and markings on her face.

Firefly's fleece is extremely dense, with tight, high frequency crimp and lots of lustre. She stands out from the other females; her conformation is perfect and her regal posture catches your eye. Visitors are always commenting on her 'look' and she certainly knows how to play that up!

Her sire, HA Raven, is a true black son of HP High Plains Amadeus and grand son of Jolimont Peruvian Pauco. Firefly has inherited Raven's regal look as well as his conformation and fleece character.

Firefly was bred to Birchleaf Xtreme, a true black herdsire and Reserve Champion, for a 2011 cria. We weren't disappointed. Firefly delivered a beautiful, solid, true black female cria this summer. We have named her Fire Cracker, as she is as energetic as her mom. Firefly is proving to be a doting mom, with an abundant milk supply and she is even nursing another cria as well as her own.

Firely has been bred to Xtreme, our Reserve Champion, true black herdsire, for a 2012 cria.
