Vlies:

21.70µ Standardabweichung 4.00µ COV (der Variationskoeffizient) 18.30% Ertrag 3.23 Kg/Jahr

(Entnommen an 8/06/2013 im alter von 1 Jahr und 10 Monate)

Faser-Untersuchungsorganisation: Australian Alpaca Fibre Testing

Beschreibung:

A stunning two year old brown male, Huachafo is a very special and unique proposition as a breeding stud. He is only one of the few offspring of Snowmass Incan King, the amazing Snowmass dark fawn stud imported to UK at vast expense, and tragically lost last year. The Dam is from the renowned Quechuan Frotte line, a daughter of Alpaca Stud Warrior, she is a lovely brown female who has produced the most consistent alpacas for the Artwork herd. Huachafo's fleece really shines, and is very fine at under 22 microns on second cutting and uniform, with lovely crimp and great coverage. Only taken to three shows, he has achieved two firsts and a second at such major events. Too closely bred to be used with the current Snowmass derived Artwork breeding females, he will bring unique value and priceless genetics.
