Blood Lineage: Snowmass
Date of Birth: 15th July 2014

Description:

Amber is a pretty mid brown female from our favourite female phonotype line, namely Meon Valley Aphrodite, a daughter of Classical Mile End Tulaco Centurion. Aphrodite previously gave us Azucena (who also produced Aurora). Amber's Sire is Snowmass Golden Legend - a direct descendant from the legendary Snowmass Matrix, whose Sire was Snowmass Quechua. To add to her impressive genetics, Amber is of lovely disposition, and is offered with a mating to any one of the top Snowmass Sires to reinforce the Snowmass genetics.
