Description:

Alpacas of the Alleghenies is offering an Elite Snowmass Quechua Grandson! The name 'Snowmass' is synonymous with outstanding elite quality alpacas. Snowmass Alpacas represents an accumulation of the world's finest and most advanced breeding genetics.

This is a great opportunity to add the Snowmass genetics to your breeding program through Apollo of the Alleghenies. Apollo is the product of Quechua's Verticase; his fleece is extremely fine and amazingly dense! Verticases' skin biopsy proves his density to be 110 follicles/sq.mm which is off the charts!!! Verticase is one of the most Elite Herdsires in our Industry today.

Upon reviewing Apollo's pedigree on the sire's side, you will find the names of most of the top Herdsires in U.S. history: Peruvian Hemingway, Peruvian Caligula, Peruvian Accoyo Elite, Snowmass Ccatanca, and Peruvian Vengador.

Verticase has passed his amazing fleece characteristics on to Apollo. The density and structure is superb! Apollo has superior fleece characteristics, a magnificent head and a laid back personality. Outstanding qualities as described by a judge at the National show 2014: Fineness, uniformity of structure, archetypal (worthy of being a pattern to be imitated). That statement describes Apollo! Give us a call to see this amazing male.

Prizes Won:
