Faser-Untersuchungsorganisation: Australian Alpaca Fibre Testing

Beschreibung:

Atkins Lylaibby is such a lovely female, calm, gentle and exceptionally easy to handle. She has a fantastic frame and beautiful head type. She always produces a long fleece with exceptional brightness. Her fleece is of a medium density and has a medium frequency crimp style. She carries an interesting mix of genetics which include Snowmass lines such as Snowmass xxxtreme and Snowmass Gold Charms. She has colour in her background which came through in her first son who was fawn. This is a rare opportunity to purchase a female pregnant to our imported male Silverstream Ozone of Sheriff. A superb male carrying a very dense, bright fine fleece with a beautiful style.
