Fleece:

22.90µ SD 5.10µ CV 22.40%

(taken on 1st May 2018 at 2 Years and 11 Months of age)

Fibre Testing Authority: Australian Alpaca Fibre Testing

Description:

A Nyetimber son this young black male carries all his famous sires hallmarks. Of a compact frame he is perfectly proportioned and with good balance it is difficult to ignore the influence his sire has had. Looking at the dams side he carries the influence of one of the early Peruvian imports, Arunvale Copper Dream whose influence we still value highly in our blood lines through some notable dams. Given this depth of genetics you would expect him to have an enviable phenotype and he doesn't disappoint. Carrying a dense fine fleece with excellent staple length he has produced excellent cutting weights, but above all has outstanding colour uniformity in this colour class. Whist not shown regularly his success speaks volumes and we have high expectations of his progeny.

Offering high value genetics that will be a bonus to any breeding programme he is offered for outside services or purchase.
