20.40µ SD (standaardafwijking) 4.40µ Opbrengst 4.00 Kg/jaar

Wolanalyse-organisatie: Australian Alpaca Fibre Testing

Omschrijving:

Dominator is such a macho, strong framed male with a fantastic headshape. This has been passed on to his progeny which are looking impressive indeed [progeny can be seen]. At the age of 5 he continues to hold a structured, organised fleeces which is very bright, soft, dense and fine. His main asset is his incredible staple length he still continues to produce even now. He still continues to lack guard hair throughout his fleece. Due to his coloured background Dominator would suit a coloured breeder that wants to improve frame, fleece length and reduce guard hair to name but a few of his attributes.
