(taken on 13th October 2014 at 3 Months of age)

Description:

Advertising on behalf of current owner. Scrappy Doo (born when the scrap man was here!) is a stunning fully grown male with a very dense fleece. We kept him as a stud, but he proved to not be fertile, so has now been castrated. He is an comes easily to food, lives with the other adult males and is head collar trained. He occasionally kicks out, so not suitable for a trekking alpaca, this is not a significant problem, but better to be aware he may, than me to hide it. Camelid Dynamics training would assist him to stop this habit (we have started on him). He is registered as modern grey. He recently went to a new home with two younger (nearly fully gown) males, but he has not settled in. He would be better with more mature males. He only left the herd at the end of April and Mullacott Alpacas has since had a voluntary whole herd (51 alpacas) clear TB test. On going support from Mullacott Alpacas offered.
