Diameter (Micron) of first fleece sample: 22.10µ

Fleece: (7th)

30.60µ SD 5.50µ CV 18.10% % Over 30 Microns(µ) 45.90% SF 29.08µ Curvature 31.50 deg/mm Yield 4.18 Kg/Year

(taken on 29th April 2019 at 7 Years and 1 Month of age)

Description:

Fiji is following in the footsteps of her sire in every way, Her first fleece micron of 21.6 assures us that she is just as fine as the Excellent EP Cambridge Courage. She has the same incredible brightness from organised staples of fibre, displaying a high frequency crimp.
Fiji also has a really soft handle to her fleece due in part to the small percentage of primary fibres within the yield and her fleece is highly suitable for quality yarn production.

Fiji is a fantastic breeding female and has given us, to date three very easy pregnancies. She is a good protective mother and is passing her quality genetics to her progeny.
Last fleece sample was taken in 2019 and Fiji produced 4.18 kgs (7th fleece).
Sample statistics: Mean=30.60, CV=18.1%, SD=5.50, SF=29.08, CF=54.1%.
Fiji will be ready for a mating 15th June onwards
White male 'Charnwood Forest Mackenzie' sired by Wellground Close Encounter

Name of covering male: Wellground Close Encounter (White)
Last Mating Date: 17th June 2020
