26.00µ Standardabweichung 5.50µ

(Entnommen an 11/03/2023 im alter von 9 Jahre)

Faser-Untersuchungsorganisation: Art of Fibre

Beschreibung:

Spring Flower is a fascinating girl for the coloured breeder. Genetically, she is a mid brown, but has an excessive display of the white spot gene, causing her to look predominantly white.

Spring Flower has a fine, silky soft fleece with excellent density

She is a proven female, having given us two gorgeous female cria and one mid brown male over the past four years - all with excellent density and handle -and a fantastic brown male this year. She has been mated back to our multiple-champion Winsaula Cracker, so should produce something exciting!

She is due April 21st 2025. She is an excellent, milky mum who needs no assistance or coddling. Her crias grow big and fast, easily reaching over 30kg in four months. She keeps her weight on well, so doesn't need lots of feed and has the added bonus of chasing dogs and foxes away, being our only alpaca who actively does so (including 60kg dogs).

All our alpacas are halter-trained for ease of handling.

All our sales come with:

a full health history of the animal
after sales support
pregnancy certificate
pre-movement worming
live cria guarantee (7 day)
discounted stud services to returning females
microchip and ear tag
BAS registration
No VAT
We can provide a Tb test at purchaser's cost.

If you require a course in how to care for your alpacas, we would be only too pleased to spend a day showing you the ropes.

Name des Deckhengsts: Winsaula Cracker (Beige)
