

Description:

Honeysuckle is an elegant female, perfect on a halter and a very good meet and greet alpaca. Honey has visited schools, care homes and hospitals making her a perfect part of the herd. She is amazing with cria but we have not bred from her due to her being a meet and greet alpaca. Her genetics are phenomenal so cria for her in future is possible, we did cover her with one of our males in 2021 but she has not taken due to the male being not mature enough. Her sire is Carlshead Demarco, a Nobility son, who was awarded 1sts in multiple white classes around the country. Her dam, Carlshead Carminia, a Fowberry Juliana daughter and Ninbella Harrison of Fowberry. We think a new home will be better for her as she lost her mum early 2021.

Number of Crias bred from female: 0
