**Date of Birth:** 12th June 2022

### Description:

Marjoram is a well bred young female from a dam that consistently breeds multis or appaloosas. We put our black male Chinchero Rufus across her hoping for a black multi and this was the outcome. Her first solid!!!

This female carries a very fine fleece and will be a fantastic breeding female put to the correct male. We feel that bred correctly she could breed both solid colours or appaloosa/multis, depending on your choice of male. Her sire came first at the Bas national show at both junior and intermediate class and her dam has bred multis that have won classes at various shows.
