20.20μ SD 4.20μ CV 20.80% % Over 30 Microns(μ) 2.80%

(taken on 5th May 2023 at 2 Years and 11 Months of age)

**Fibre Testing Authority:** Art of Fibre

### Description:

Bozedown Summer Breeze is a lovely compact female. Her fleece is extremely bright and is uniform in micron across the prime area of her blanket. She grows a good length of fleece and this length is still evident in her neck fibre as well. Summer Breeze has been scanned positive 2023

Summer Breeze although is white is carrying some of our best fawn genetics. Her maternal grandmother Bozedown Trixie produced some amazing females for us.

She has been mated to our superstar Bozedown Ascendant and with this combination their progeny should be very special whether it comes out white or fawn as Ascendant is great at producing either.

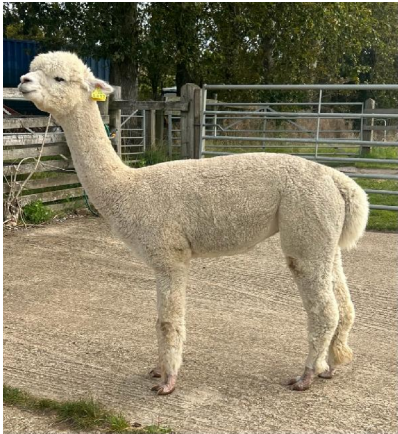

**Name of covering male:** Bozedown Ascendant (Beige)

**Last Mating Date:** 22nd June 2023

**Estimated Date Cria Due (Pregnant Female):** 22nd May 2024

Number of Crias bred from female: 1
