(taken on 15th April 2024 at 3 Years and 8 Months of age)

Description:

TOFT MOAZAGOATL is a solid white female . She is a daughter of TOFT TORNADO (SLF) and TOFT MIRA (SW).

TOFT Tornado is the full brother of our National Champion Dark Brown male Toft Timogen.

TOFT Tornado is Solid Light fawn and is exhibiting, at 9 years old, a distinct longevity of fineness. He carries a superfine very uniform fleece with density and an exceptional handle. He is throwing the same positive traits over his offspring as his brother TOFT Timogen and his late father LAVENDER PARK TULLEY.

TOFT MOAZAGOATL is exhibiting and maintaining a very uniform consistent fleece with the quality extending right out to the extremities of the alpaca. As you can see from the most recent fleece statistics above the closeness of the mid side and lower mid side stats are proof she is carrying a very impressive uniformity in her fleece.

TOFT MOAZAGOATL is a female at the forefront of the TOFT Alpacas Breeding over the past 25 years. As you can see she has a dark fawn spot on her back right thigh but she does not carry any other dark fibres in her fleece. She is currently pregnant for 2025 to our Champion Medium Fawn Stud Male HERTS Big Bopper who has produced many

prizewinning alpacas for us here over the past couple of years. We are confident she will consistently throw coloured cria with exceptional fleece traits.

TOFT MOAZAGOATL represents a real opportunity for aspiring breeders to purchase a young very advanced alpaca to jump start their alpaca adventure.

As you can see from her pedigree she is packed with the very best of Australian genetics.

TOFT MOAZAGOATL is maintaining a fine very uniform fleece her fleece stats vary very little from her mid side to lower missed and are consistent through to her extremities.

TOFT MOAZAGOATL - is pregnant for 2025 to our Dark Fawn Stud Male HERTS BIG BOPPER .

EDD:- 09/07/2025

Name of covering male: HERTS BIG BOPPER (SDF) (Dark Fawn)

Last Mating Date: 23rd July 2024
