**Dam:** Butlers Farm Black Treacle

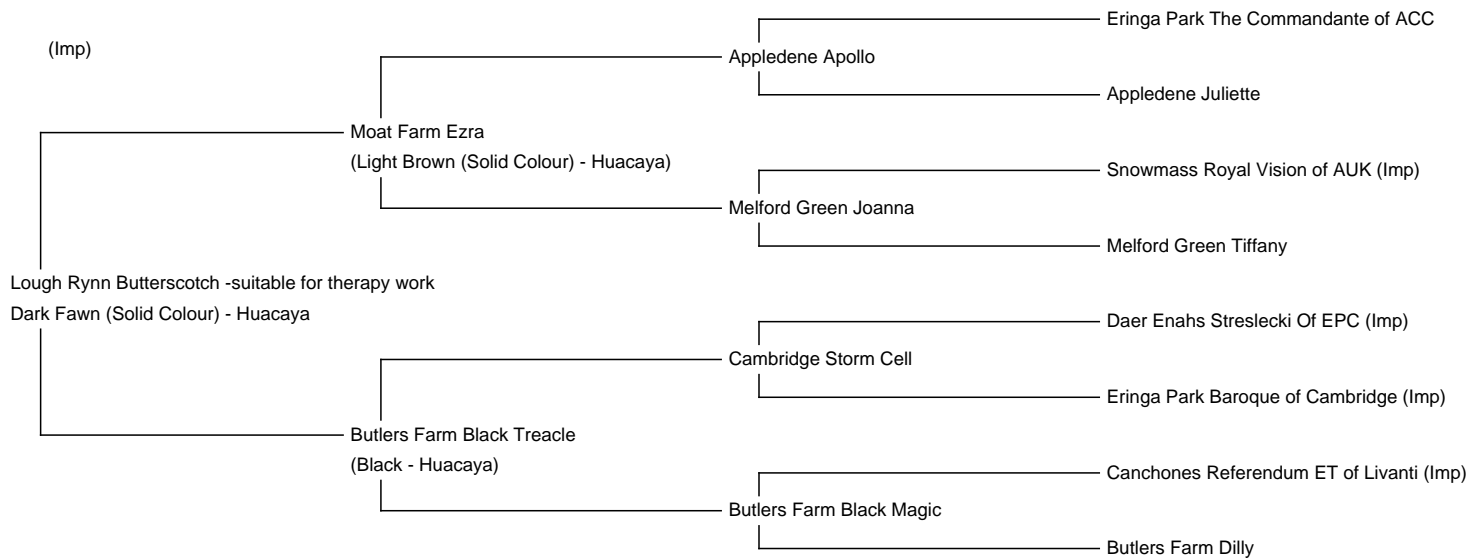

**Type:** Female

**Breed Type:** Huacaya

**Colour:** Dark Fawn (Solid Colour)

**Registered With:** UKBAS44349

**Date of Birth:** 10th June 2023

### Description:

Butterscotch is an absolutely fantastic young female, not only is she extremely friendly and loves nothing more than coming up for a scratch and to be fussed over, she is also well-grown (in fact, she was already born well-grown!), has a lovely conformation and a soft, highly processable fleece.

Butterscotch is fully halter-trained, climbs confidently in and out of the trailer and has been on walks with us around the property. Because she is so friendly, to the point of being soppy and downright cuddly, she would make an absolutely perfect addition for those who built their business around walking / offering experiences with females. Butterscotch would also make a great therapy alpaca as she is one of only three genuinely cuddly alpacas we personally know - rare as hen's teeth and worth her weight in gold! She actively seeks out physical contact and can patiently stand or sit for hours being scratched.

We aren't breeding anymore and, while Butterscotch could just stay with us as a pet, she comes from a maternal line of outstanding breeders and it would be a shame to not have her go down a route where her talents are actually used (in the breeding or experience sense!). The females in her direct line have all always fallen pregnant at the first mating and give birth to big, strapping cria who then go on to gain weight at a rate of approx. 2+kg/week.

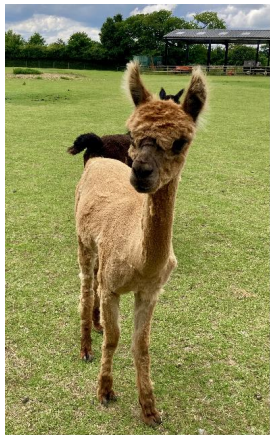

Butterscotch carries excellent genetics on both sides (Daer Enahs Streslecki Of EPC (Imp) / Eringa Park The Commandante of ACC (Imp)) and has a lovely dark fawn fleece that combines her dam's fineness and her sire's density. Her dam has been part of the EBV program and has consistently come in the top 5% for fineness but lacks the density that we have been successfully adding via denser studs.

She will only be sold into an existing herd of at least 3 females (or a newly formed one). Full ongoing support is provided and delivery can be arranged.
