Description:

Woolville Bee's Knees is an absolutely stunning pregnant female who is right at the top end of brown breeding here in the UK. Having recently won champion brown female under great competition, she offers a rare opportunity as she is being sold on consignment from the breeder Woolville Alpacas.

To look at this female is very stylish and she has a very desirable phenotype. She is well covered in fleece and her presence is exceptional.

She grows a very dense fleece that is bright, fine and extremely uniform in both colour and micron.

She has been bred to one of our densest males with the hope of a brown or black cria being the obvious outcome based on her genetic colour code.

With a very current and elite quality pedigree, Woolville Bee's Knees is ideal for those wanting to breed the best!

This halter trained breeding female comes with all our normal guarantees including live cria, full veterinary health check and our long term advice and support.

Available for domestic purchase and also export to the EU, Norway, Switzerland, India and the Middle East.
