(taken on 13th May 2024 at 11 Months of age)

Fibre Testing Authority: European Wool Testing Authority

Description:

Due to an upcoming property sale, we must sadly downsize our highly regarded alpaca herd. This presents a unique opportunity to acquire Havana, a promising young female with exceptional breeding potential, at a very attractive price.

Havana is a captivating presence with a fine and dense fleece that drapes elegantly over a strong, structurally correct frame. Her consistent colour throughout showcases her excellent quality.

Her pedigree is truly impressive. Her sire, Redens Agamemnon, boasts an enviable show record, having won multiple championships and sired champions. This highlights Havana's strong genetic potential. Further enhancing her pedigree is her grandsire, Eringa Park Golden Age, who brings the genetics of the renowned Windsong Valley Fire Dragon into her lineage. Additionally, the strong black pedigree of Daer Enahs Streslecki, her other grandsire on her dam's side, adds to her exceptional heritage.

Ready for her first mating in 2025, Havana's combination of a solid phenotype, a lovely soft fleece, and excellent genetics makes her an invaluable asset to any breeding program.

Note: Havana was sheared as a cria, so the provided staple length reflects 9 months of growth.
