19.46µ SD 4.07µ Staple Length 95 mm

(taken on 13th May 2024 at 10 Months of age)

**Fibre Testing Authority:** European Wool Testing Authority

### Description:

Due to an upcoming property sale, we must sadly downsize our highly regarded alpaca herd. This presents a unique opportunity to acquire Harper, a promising young female with exceptional breeding potential, at a very attractive price.

Harper is an attractive female with a fine and dense fleece that drapes elegantly over a strong, structurally correct frame. Her consistent colour throughout showcases her excellent quality.

Her pedigree carries some of the best black genetics. Her sire, Redens Explorer, is the full brother of Redens Agamemnon. Her dam Redens Vanilla is the mother of Redens Cromwell and her grand sire is Lillyfield Jack of Spades. Her grand dam is Cambridge Chiddy Bang Bang the daughter of Cambridge Pyralis her grey sire.

Ready for her first mating in 2025, Harper's combination of a solid phenotype, a lovely soft fleece, and attractive genetics makes her an invaluable asset to any breeding program.

Note: Harper was sheared as a cria, so the provided staple length reflects 9 months of growth.
