**Date of Birth:** 11th May 2024

## Description:

Meet Rhyndaston Delight, a gorgeous bay black weanling alpaca with a fantastic fleece and a wonderfully curious nature.

Delight's fleece is dense and fine, with a soft, uniform staple and a rich bay black colouring that will develop beautifully with maturity. She carries a strong, well-balanced frame with excellent substance of bone, showing all the signs of growing into a very impressive adult.

Friendly and confident, Delight is halter trained and walks well on the lead, making her a pleasure to handle. Raised with plenty of interaction and care, she is healthy, fully vaccinated, and used to being part of a well-managed herd.

Her strong genetics, combined with her conformation and fleece qualities, make her a brilliant addition for breeding, showing, or fibre production — or simply as a much-loved member of a growing herd.

If you're looking for a young female with both quality and character, Delight is sure to live up to her name!
