**Breed Type:** Huacaya

**Colour:** Medium Grey

**Registered With:** Birth Notified with BAS

BNBAS17952

**Date of Birth:** 24th May 2023

### Description:

Definitely his fathers son., In the field, it is sometimes difficult to tell them apart. The black 'bandana' over his head gives him away. He is tall, strong, has brilliant conformation and beautiful colouring and markings. Like his father I think he will make a great stud male. While unproven as yet, he has shown a great interest in the girls. If it wasn't that so many of our females are closely related to him I wouldn't consider selling him. He was halter trained at 6 months and walks with an attitude that adds to his photogenicity.

Jasper can be sold individually if joining an existing group or we can put together a package deal of 3 or more males. Please contact us for more information.
