*(taken on 10th March 2025 at 1 Year and 9 Months of age)*

**Fibre Testing Authority:** Alpakotela Lab

### Description:

Inca Sylvester is a really upstanding and well put together young male. He has excellent proportion, leg angulation plus width to his frame and all aspects of his conformation are correct. He is from a fast growing and early maturing family line that have expressed high health and fertility.

His fleece is very advanced with densely packed deep crimping fibres making up bright and soft handling staples. He is very uniform in both micron and colour and his primary fibres are fine.

We expect this male to come on line later this summer and with his highly performing pedigree he has all the ingredients of being a very impactful herd sire, ideal for those with fine fleeces females that need density and frame volumed added in.

This halter trained male comes with all our normal guarantees including registration upgrade, fertility, full veterinary health check and our long term advice and support.

Available for domestic purchase and also export to the EU, Norway, Switzerland, India and the Middle East.
