### Description:

Named for Rip Wheeler from Yellowstone, this little chap is nearly a year old and will make a fantastic addition to an alpaca walking or pet home. He is halter trained, hand feeds happily and enjoys an amble past tasty hedges.

We're expecting him to grow into a mid-sized, stocky alpaca as both his parents have a fairly square body type. Rip has not been shorn yet but, once that is done, a peek into his fleece is of course also available. While the outside of his fleece currently looks to be a very light brown, he is in fact dark brown underneath his crimp and will make a beautiful fibre producer.

Rip will only be sold into an existing (or newly formed) herd of 3 or more males; ideally with at least one other yearling to play with. Full ongoing support is provided and delivery can be arranged.
