Dam: C-S Alpacas India

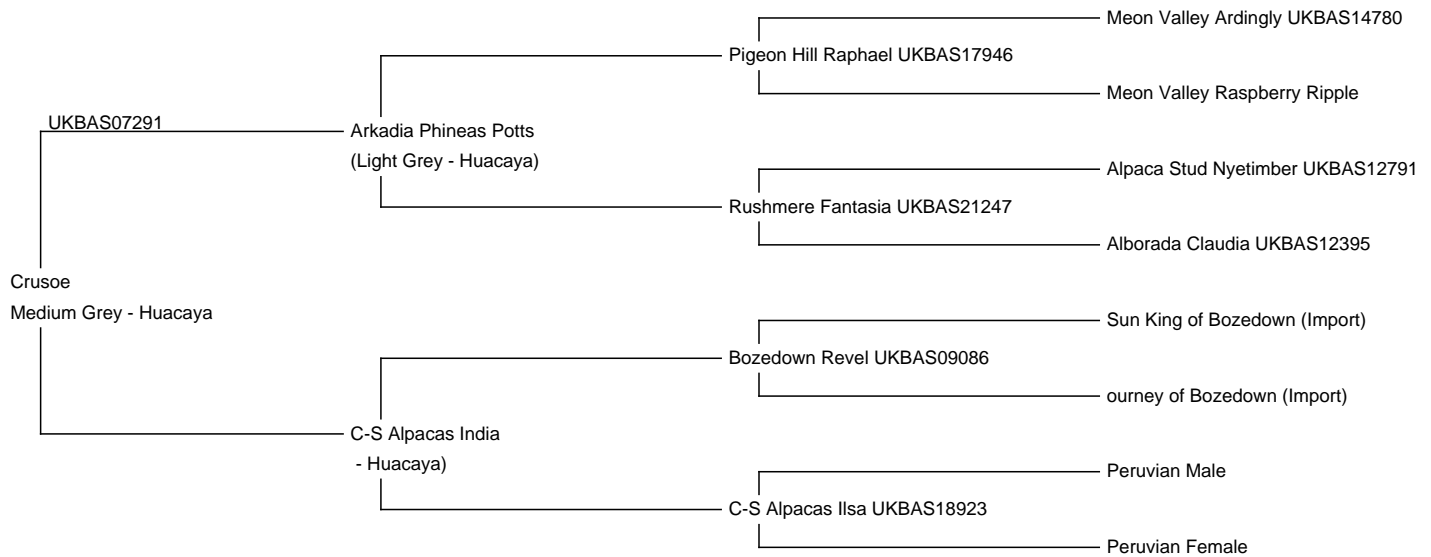

Type: Stud Male

Breed Type: Huacaya

Colour: Medium Grey

Registered With: BNBAS17765

Date of Birth: 17th July 2023

Description:

Selling as part of a package of 3.

Hideaway Crusoe is a gentle 2 year old modern grey. Fully halter trained, he's been part of our walking team since he was 18 months old and he walks steadily and calmly.

He's fairly shy and likes to be at the back on a walk. Easy to handle for husbandry tasks.

We have 3 lovely walking/pet boys for sale. We are ready to bring our own home born males into our walking team, so it's with some sadness that we're selling some of our most popular walking boys.

Jack and Duke are in tact but listed as non breeding. Crusoe is BAS listed but has not yet been registered as a stud.

All are halter trained and well-walked and handled. Up to date with all husbandry and vitamin drenches.

At Hideaway Wood Farm our focus is on breeding and caring for healthy, happy alpacas in a natural and respectful way.

We have a herd of 35 alpacas, many of which were born here on the farm and we know each of our animals individually. ​

In terms of breeding, our focus is not on breeding for particularly desirable traits as we know the trends are always changing and that some traits can end up not being the best for the health of our alpacas. Instead we breed our animals

with a focus on them being healthy, behaviourally well natured and with good conformation that will support their health and longevity.

In terms of handling, we have been moving in the direction of CameliDynamics handling and training for our whole herd.​

And in terms of husbandry we are always seeking to incorporate more natural ways of taking care of our alpacas, removing unnecessary chemicals and supporting them through natural treatments and remedies wherever possible.
_____​

Whether you are completely new to alpacas, looking to build your existing herd, seeking an animal for a specific purpose or simply curious and wanting to come and have a look to see if alpacas are for you, we're happy to give you time, answer your questions and support you in the process.

We know all of our animals individually and can advise in terms of temperaments, breeding, pedigree and history. Our whole herd is BAS registered and we can provide a full medical record.

But more than all of that, we love our animals and love to meet alpaca people.

Please note, alpacas are herd animals and need to live in groups of at least three. We are happy to advise on and support with alpaca keeping and provide ongoing support as part of the sales process.​​​​​

Our Package​

When buying from us we can offer mentoring services where needed. We can chat to you on the phone, offer email support, you can spend time with us on our farm and we can where possible visit your farm to support you as you get started or when issues or questions crop up. ​
