(Entnommen an 23/06/2024 im alter von 1 Jahr und 11 Monate)

Faser-Untersuchungsorganisation: Art of Fibre

Beschreibung:

Chestnut Farm Pumpkin is a lovely well grown young maiden female, she is solid dark fawn in colour and has an extremely calm temperament and is halter trained and easy to handle.

Pumpkin has great substance of bone and correct confirmation with a lovely fine soft handling fleece that shows great density and lustre.

She has a very pleasing head style.

Pumpkin is sired by our solid light brown stud male Inca Nobleman, her dam is Chestnut Farm Honeysuckle who is one

of our Beck Brow Ammunition daughters.

Her grandmother is our Championship winning female Chestnut Farm Cassie.

Pumpkin is full sister to our Solid White Supreme Champion Chestnut Farm Mr Whiteley.

This promising female carries a wide selection of high quality genetics and is the result of years of layering in our breeding program which we are very proud of.

Pumpkin would be an asset to any herd wanting to add some quality genetics and will be ready for mating in the spring, if like her own mother she will make a fantastic mum and produce some stunning cria.

We are only releasing Pumpkin because she is related to all three of our stud males so we don't have anyone suitable to go over her.

Pumpkin will come with a printout of her medical history and will have a faecal egg count done before leaving the farm.

Full back up and support offered for the life of the alpaca.

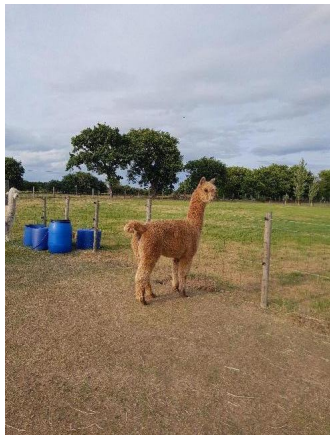

Pumpkin will only be sold to a home that has females of a similar age or we could put a package together as we do have other young female's available.
