15.70μ SD 3.60μ

(taken on 11th December 2023 at 7 Months of age)

Description:

We would describe Siena as a great entry-level investment for breeders looking to build upon an already impressive genetic package! On her dam's side we see a combination of Fowberry and Snowmass genetics, whilst her sire is a multi-award winning son of the legendary grey Alpaca Stud Nyetimber. She's in great shape and ready to be mated in the spring. Like all our animals, Siena is halter trained and friendlier than most.
