Beschreibung:

Nutmeg was imported from Canada and selected for her fine fleece and grey genetics.

Whilst registered as a solid brown, she is actually now a modern grey and this colouring is gradually extending over her blanket, and she would therefore be a very good bet to produce grey cria.

She is very sweet natured and easy to handle, feeds from your hand and always first to come and see you.

Shown once as an intermediate she came 2nd in the brown female class - before the grey started to come through!!
