Description:

Inca Texas is a male with great presence and style. He is well covered in fleece and his frame is square and extremely balanced.

He brings together two very reliable and trusted lines in Shadow and Timogen and this cross is expressed in a long stapled male with good brightness and a balance of fineness and density.

Inca Texas is ideal for those looking to inject fast growth and looks into their coloured breeding programme without compromising on fleece quality.

His DNA colour code results are expected soon. This halter trained male comes with all our normal guarantees including fertility, full veterinary health check and our long term advice and support.

Available for domestic purchase and also export to the EU, Norway, Switzerland, India and the Middle East.
