Description:

Red Granites Fever's Salvation is a full-brother to Red Granites Satin Fever, now owned by Amber Autumn Alpacas in Oregon, who sold for a stellar \$34,000 in our rare junior herdsire package deal at the EDU this year! He is everything we wanted plus more!!

The density, fineness, and uniformity this male carries is phenomenal. His brightness should be noted as well as his picture perfect phenotype and good size. His fleece is high frequency and high amplitude with crimp from skin-to-tip, all across his frame from head to toe - literally!! This boy is QUALITY.

His juvenile show career was fantastic. Great compliments from every judge he was under. Amanda VandenBosch and Wade Gease both commented that he is "one to watch", and we couldn't agree more.
