Date of Birth: 15th April 2022

Description:

Colo Lsere is by Red Granites Val D Lsere, who by now needs no introduction, and is out of one of our lead production dams who has never disappointed, Little Carmela. This makes him a full brother to: Red Granites Cinnamon (2019 AOA National Fleece Show Fawn Female Color Champion, 2020 AOA National Fawn Female Color Champion, multiple Judges' Choice winners & auction high-seller who resides in Belgium), Red Granites Casper (2021 Futurity White Male Color Champion, 2020 AOA National Fleece Show White Male Reserve Color Champion & Fleece Judges' Choice winner), and Red Granites Carmelita (Reserve Champion winner owned by Heather Glen Alpacas). The proof is in the progeny folks!!! We highly encourage you to take a deep dive into the maternal side of this males pedigree because it isn't every day a foundation females samples champion winning progeny each time she is bred...

Colo Lsere has taken on the family tradition, following in his sibling's footsteps. As a juvenile he has an impressive show record having won 3 Championships (throughout halter and walking fleece), this also includes his ever-so-impressive win at the 2023 AOA National White Male Color Champion in a class of 29 white males under Wade Gease, an incredible accomplishment for a juvenile!! He continued his success in fleece shows. At the 2024 IFA PNAA Show he won the Grade 1 White Reserve Color Champion banner with great comments from the judge!

He has been called a "fleece monster" with "extraordinary fineness and uniformity" and "superior fleece rate growth for age". You truly have to get your hands on this male to care of his quality.

Fiber and Fleece Description

Colo Lsere has so much fleece packed onto his frame. Density galore with an extremely high-frequency fleece that

carries through into his extremities. He has extreme brightness and a very soft handle to his fleece. To boot, he grows an impressive length of staple. Just an incredible fleece, and it just keeps getting better.

Colo Lsere will start breeding for us this Spring!
