(taken on 1st May 2018 at 7 Years and 10 Months of age)

Fibre Testing Authority: Australian Alpaca Fibre Testing

Description:

This young black male carries himself with great confidence and presence, as well he might given his lineage. A grandson of Jaquinto, he has that beautifully balanced frame that we take for granted from this line along with a wonderfully soft handling fleece so typical of the Jaquinto line. His dam is a full Peruvian from our 2006 Canadian import sourced from Neville Lake alpacas. Sadly deceased she had a tremendous frame to her with outstanding substance of bone and showed her own prepotency through consistency of cria. Black Label shows all the characteristics of her parentage and has the potential to offer great things to your breeding programme. This is a young black full of promise.

Latest mid-side sample taken on 11-May-2012.

Sample statistics: Mean=22.70, CV=18.6%, SD=4.20, SF=21.66, CF=94.8%.
