Fibre Testing Authority: Australian Alpaca Fibre Testing

Description:

Canterbury is an exceptional young male with a brilliant pedigree behind him. His dam is from the Christina family, a family which has consistently produced the very best of our breeding herd. His sire, Canute, boasts snowmass royal vision and golden gun in his lineage. Canterbury has amazing presence and superb conformation. His fleece is beautifully soft handling and there is plenty of it too. He tested at 17.7micron on his 3rd fleece with a sd of 3.9. This young male is one to watch!
