(taken on 2nd May 2018 at 7 Years and 1 Month of age)

Description:

Storm Cell is a very handsome stud with a great cheeky personality that he definitely passes onto his progeny. He also has a fantastic head shape, true to the huacaya phenotype. Looking at the majority of his cria, the biggest similarity between them all is their head shape, showing Storm Cell has some strong conformation genetics.
Strom Cell' fleece is incredible fine with a lovely soft handle. His 2018 samples from his 6th fleece shows he has a fantastic low micron count of 20.10. With a brilliant fine fleece he also has the density to add with his blanket weight of 2018 being 3kgs. His 2018 sample also showed a low SD of 4.30 proving consistency throughout his fleece.

Storm Cells 3rd fleece had a micron count of 19.5 so three years on you can see his fleece is still of a very high standard.

Stormcell's current awards below show what fine genetics the cria will inherit.

2012 Futurity Junior Black 1st
2014 Alpaca Showtime Adult Black 1st
