(taken on 2nd May 2018 at 5 Years and 9 Months of age)

Description:

We have owned Helenia Galleron for 2 years now and he has had 4 cria with us. 3 males and one female. His latest male 'Charnwood Forest Duvet Day' is our best looking cria from 2018 with a very impressive fleece, so we are looking forward to seeing how his fleece develops over the next 12 months.

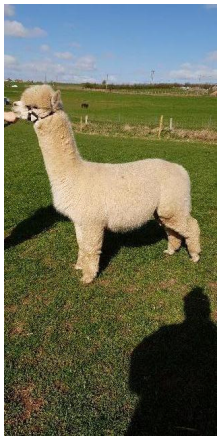

Helenia Galleron has great body conformation with a solid true to huacaya phenotype head shape, broad chest and very strong back legs.
Helenia Galleron was last sheared 2nd May 2018. This is the second time we have sent a sample of his fleece off and we are very happy with the results. Helenia Galleron has a nice fine fleece with a micron count of 23.4 with a great SD of 4.90 showing consistency throughout his fleece. Helenia Galleronalso has density to his fleece with his latest blanket weighing a fantastic 4.53kgs.
There is also a lovely brightness to his fleece.

Helenia Galleron is available for onsite mating, at the cost of £600 plus VAT
