16.00µ SD 3.40µ CV 21.30% % Over 30 Microns(µ) 0.00% SF 15.60µ Curvature 43.00 deg/mm Yield 5.50 Kg/Year

Staple Length 120 mm

*(taken on 4th May 2018 at 1 Year and 11 Months of age)*

**Fibre Testing Authority:** Australian Alpaca Fibre Testing

### Description:

At last we have finally found a grey male that ticked all our boxes. After years of searching we saw Blaine at the BAS National in 2019 and knew he was the male for us.

No compromise needed or fibre stats (though they are pretty impressive), this male stands out as being the most impressive grey male we've seen in our quest for a new grey herd sire to use in our grey breeding programme.

To start with his conformation sets him apart from others. He is well built, in perfect proportion with strong bone and no defects. All enhanced by his beautiful head style, even colouring and a great fleece length and coverage. Moving onto the fleece .... The fibre stats back up what we saw and felt when we first met Blaine. He is very dense, very fine and

even in his fineness.

He has a very low percentage of primary fibres and cuts a very heavy, stylish fleece full of high frequency, high amplitude crimp from skin to tip.

To top it all Blaine works enthusiastically and productively and has a lovely temperament
