Date of Birth: 21st May 2017

Description:

Limelight is a striking silver grey alpaca, he is well grown with outstanding attributes to his fleece. We are extremely please with the first few progeny from limelight this year, he has passed on his fleece density, and the cria are growing very fast.
Limelight has matured into a strong male, with a great phenotype and bone structure, he also has sound conformation and is always standing proudly in the paddock.
His fleece has a long staple length, with good crimp structure and low primary fibres. With great density and being very uniform in colour for a grey, we find Limelight to be the perfect grey macho.
Coming from an excellent pedigree, sired by Sutierra Shadow, who needs no introduction. Also having one of Incas top grey breeding maternal lines through his dam, Inca Grey Evening Light, he is just the man for the job.
