Fibre Testing Authority: Art of Fibre

Description:

Putjade Quantum of Solace is a striking leopard appaloosa, matching our own requirements for an appaloosa to be 'spotted from head to toe', with an even distribution of contrasting spots across the body.

Quantum is conformationally correct, with a pleasing head-type and excellent fleece coverage. Despite being an appaloosa, he displays excellent uniformity between colours, and we are delighted to have brought in a male with such an advanced fleece for an appaloosa; exhibiting great staple length, fineness and density.

Genetically, Quantum is sired by NZSummerhill Leopard Toros Rolex of AVF (Imp), an imported New Zealand male. His dam is sired by Lavender Park Tulley (Imp), who needs no introduction.

Quantum has a lovely temperament, and eagerly began his working career in Summer 2024, with a 100% success rate across his first group of elite females here at Natterjack Alpacas. As of January 2025, Quantum has shown no

susceptibility to external or internal parasites. Quantum will be available for one outside stud service in 2025, which will be exclusively available via the BAS National Show's Online Stud Service Auction.
