Registered With: The British Alpaca Society

UKBAS31846

Blood Lineage: Australian

Date of Birth: 21st June 2017

Description:

HERTS Big Bopper is a very well grown Champion male with very strong bone and a superb robust and compact conformation. He carries a fine consistent fleece with an extremely long staple length and cuts serious weight on the shearing table. 2021 witnessed almost 3.5 kg of clean fleece weight cut from this male.

As you can see from his pedigree his genetics go back through the Legendary Lavender Park Tulley to the very best of Australian Genetics and on both sides of his lineage contains the names of some of the very best herds in Australia and many many ancestors of colour. The Big Bopper seems always consistent in producing coloured cria.

We bought him to add stature, staple length and density to our herd. All of which he has achieved in spades. The Boppers offspring carry their father's strength of frame and compact presence with a dense well organised, fine fleece. As such they are distinct in their conformation and carry their fathers presence and style. Their fleeces are colour consistent with an impressive architecture and have started to make their mark in the UK showing.

If you want to add some weight and presence to your herd then The Big Bopper is well worth your consideration.
