Description:

Orion stands on a compact frame while displaying a great degree of bone density which is a must here at Ballymac. As we dive further into his fleece we see an amazing level of uniformity throughout the mid-section leading well into the extremities. A trait that is not seen in many grey alpacas. This is complimented with a low micron of 16.7 and a SD of 3.4 on his second fleece.

He is dominant in throwing his grey colour to his cria.
